*General Paul Nakasone presenting a Hall of Honor plaque to Hilda Faust Mathieu in November 2018*

Ms. Faust was one of the earliest analysts to understand and research the vulnerability of computer networks. She turned this knowledge to the protection of sensitive U.S. government communications, and also helped found an early predecessor to today's computer network exploitation. Hilda Faust Mathieu (her married name) was inducted into the Cryptologic Hall of Honor in November 2018.

508 Caption: 1) a formal picture of over 30 men and one woman standing in rows on the front steps of the National Cryptologic School building; 2) General Nakasone presenting a Hall of Honor plaque to Hilda Faust Mathieu in November 2018.
